Safe Haven Security

ABOUT US

Safe Haven Security Services, a company established in 2018 specialising in security operations, guarding services, mobile patrols services, The company is led by aviation professionals and pilot owners who have been actively involved in the aviation industry since 2009, driven by a long-standing passion for aviation and a commitment to enhancing safety and security across the industry.

Through our work with aviation and aerospace partners, we recognised the growing need for specialised aviation security and operational advisory services tailored to the unique challenges of airports and aviation facilities. This inspired the creation of Aviation Analysis, combining practical security experience with aviation knowledge to deliver solutions specifically designed for the aviation sector.

From landside facilities to airside operations, Aviation Analysis assists airports, airlines, government facility in developing security protocols, operational procedures, airport zoning frameworks, and risk-based security solutions. Our objective is to transform every part of the airport environment into a structured and actively managed security area through effective zoning, area categorisation, and situational awareness strategies.

Our approach is guided by ICAO Annex 17 principles, Aviation Security (AVSEC) best practices, and modern security technologies, helping clients build practical, sustainable, and compliant security systems.
